

GENERAL CONSTRUCTION - GC

General Construction describes the type of construction used in the structure where the fire occurred.

Notes: a) If more than one type of construction is involved, code under that type of construction which constitutes the major portion.

b) If general construction is not applicable as in the case of a vehicle, or outside area, code under 0008.

c) Heavy timber construction consists of floor-ceiling assemblies which are constructed of wood where the thickness of structural members is not less than three inches.

- 1000 Combustible construction - open wood joist
- 2000 Protected combustible construction - wood protected by plaster/gyproc
- 3000 Heavy timber construction
- 4000 Non-combustible construction - exposed steel
- 5000 Protected non-combustible construction - protected steel or concrete

- 0008 Not applicable (e.g. vehicle, outdoor, person)
- 0009 General construction - unclassified (describe)
- 0000 Cannot be determined
